INDUSTRIAL PRODUCTION

There was a slight decline in the index of industrial production from August to September. Gains in mining, electricity and gas, and in non-durable goods production were more than offset by the decline in the output of durable goods.

⁽¹⁾Averages or totals of unadjusted data.
⁽²⁾Seasonally adjusted at annual rates.
⁽³⁾Seasonally adjusted quarterly averages of monthly data.

⁽¹⁾Gross National Product at market prices excluding accrued net income of farm operators from farm production.

MANUFACTURING PRODUCTION

Components of durable goods production such as iron and steel products and transportation equipment declined from August to September, while non-durable output showed a small gain.

(a)Averages of unadjusted data.

(a)Seasonally adjusted quarterly averages of monthly data.

EMPLOYMENT

Seasonally adjusted non-agricultural employment declined moderately in September. While mining employment increased, both manufacturing and construction employment declined.

SELECTED GROUPS IN RETAIL TRADE

New passenger car sales seasonally adjusted stabilized in September after a strong upward movement from the June low. Sales of both clothing stores and furniture and appliance stores declined.

EXPORTS AND IMPORTS AND CORPORATION PROFITS

Seasonally adjusted exports of goods fell off in September. The declines in iron and its products and non-ferrous metal exports offset the continued expansion in agricultural exports. Imports of goods moved upward again in September.

^aAnnual estimates are as of June 1. ^bSeasonally adjusted at annual rates. ^cManufacturing inventory owned by manufacturers, whether held at plant or not, at end of period. ^dRevised to include the inclusion of additional municipalities in the "urban 5,000 and over" category. ^eValue of weekly rates. ^fMiddle of month. ^gRevised to include new branch municipalities. ^hPrior to January, 1957, this total includes the net amount generated by the more important central electric stations, i.e. companies, municipalities and individuals selling or distributing electric energy. From January, 1957 it includes all generating agencies producing over ten million kilowatt hours per year. The total generated on the old basis for January 1957 was 7,457 million kilowatt hours. ⁱEnd of period. ^jIncluding personal savings deposits. ^k1,200 cu. ft.

Note.—Until the end of 1956, annual data for births, deaths and marriages are based on tabulated figures by month of occurrence on the basis of residence. Data for 1956 have been revised accordingly. Monthly figures for 1957 are provisional and represent registrations filed in Provincial Vital Statistics offices during the month under review, regardless of the month of occurrence.

⁽¹⁾Not applicable to figures on population and immigration.

⁽²⁾Yukon and North-West Territories not included in figures for births, marriages and deaths.

⁽³⁾Estimates are given by year as of June 1 and by quarters for Canada as of June 1, 1952.

⁽⁴⁾Exclusive of stillbirths.

⁽⁵⁾Immigrant admissions by country of last permanent residence. Annual and quarterly figures are totals for the period.

⁽¹⁾Accrued net income of farm operators from farm production. The seasonally adjusted data include an arbitrary smoothing of crop production, standard seasonal adjustments for live-stock items and a seasonal adjustment for earnings of the Canadian Wheat Board. Because of the arbitrary elements too precise an interpretation should not be given to the seasonally adjusted figures for this item.

⁽²⁾This item differs from column 4, bottom of page 6, in that it excludes undistributed earnings (and the inventory valuation adjustment) of the Canadian Wheat Board.

⁽¹⁾Excludes gold.⁽²⁾Arithmetically converted from 1935-39 = 100.⁽³⁾Indexes August, 1955—July, 1956 are final with the inclusion of final participation payments for Western wheat announced in May, 1957. Subsequent indexes are subject to revision.⁽⁴⁾Excluding Newfoundland. Western grain prices used in the construction of the Index prior to August 1, 1956 are final prices. Since August 1, 1956, only initial prices are available for wheat, oats and barley.

Note: The coverage of this series has been expanded as of January, 1957 to include, in addition to Central Electric Stations industrial power installations that generate electricity for their own use. Except for utilities, comparable data for previous months are not available.

⁽¹⁾Prior to January, 1957, these totals include the net amount generated by the more important central electric stations, i.e. companies, municipalities, and individuals selling or distributing electric energy. From January, 1957 they include all generating agencies producing over ten million kilowatt hours per year. The total generated on the old basis for January 1957 was 7,457 million kilowatt hours.⁽²⁾These columns include all generating utilities and generating industries respectively.⁽³⁾Less imports.⁽⁴⁾Total net generation less net exports. Total power available for disposal for January, 1957 on the old basis was 7,170 million kilowatt hours.⁽⁵⁾Mainly the amount used in electric boilers.

(1) Includes copper fine in ore, ingots, bars, billets, rods, strips, sheets and tubing.
(2) Includes copper oxide and fine.

(3) Includes ingots, bars and billets.

(4) Includes nickel in matte or speiss, oxide and fine.

(5) Includes lead in ore and in pigs.

⁽¹⁾In industries where long-term contracts involve the receipt of progress payments, all such payments are treated as sales. The series represents an estimated projection, on a monthly basis, of the latest available Census of Industry values.

⁽²⁾Total new orders received during the period, at estimated selling values. The series covers total New Orders, net of cancellations, regardless of whether the orders will be filled from stock or as a result of activity during the same month (and also be reported as shipments in the month received) or whether they will be added to existing backlog.

⁽³⁾Estimated total unfilled orders on books at end of month, irrespective of work done on them or of stocks from which they can be filled, but less progress receipts in industries working on long term contracts. Sales in these industries include progress receipts. Estimates are derived by inflating the monthly reported values to total for each industry on the basis of the estimated year-end total values for each industry as obtained from annual surveys.

⁽⁴⁾Manufacturing inventory owned by manufacturers, whether held at plant or not, at end of period.

Sources: Monthly Report of Inventories, Shipments and Orders in Manufacturing Industries, D.B.S.

Source: Monthly Report on Primary Iron and Steel, D.B.S.

Note.—Effective January, 1957, the data in this table relate to rolling mills products only. Shipments to consuming industries of castings, forgings and steel pipe, previously covered, are no longer included. On this account totals shown are not comparable with those of previous years.

(1) Shipments for further processing within own firm and for sale in Canada.

⁽¹⁾Includes some silvery pig iron formerly included with ferro-alloys.

⁽²⁾Excluding shipments for processing.

⁽³⁾Imports include, in addition to

all other shapes, wire and wire rope. Imports exclude castings, forgings, fittings and couplings.

⁽⁴⁾Monthly average.

*Construction of dwelling units.

Note.—These data are the results of a nation-wide survey carried out each month by the Bureau of Statistics with the co-operation of the Central Mortgage and Housing Corporation. All Metropolitan Areas and Urban Centres with a population of 5,000 or more are enumerated completely. Approximately 400 sample areas lying outside these municipalities were also chosen for complete enumeration; in June, 1955, the number of sample areas was increased to nearly 800.

⁽¹⁾The coverage was extended to 507 municipalities in 1948, and as of 1956, stands at 901, minor revision still being required in the table, due to the non-receipt of returns from a few small places. No account is taken of the building activity outside of registration areas. Actual operations normally follow the granting of permits but a number of projects are not undertaken or abandoned. The amount depends upon the statement of the applicant and considerable change may develop before the completion of the operation.

⁽¹⁾Overseas clearances plus U.S. imports for domestic use compiled from returns of Canadian elevator licensees and advice from American grain correspondents.⁽²⁾Customs exports are adjusted to reflect actual physical movement of wheat flour from Canada. Data shown for the last three months are not so adjusted.⁽³⁾Annual data are monthly averages of crop year. ^(d)Includes eggs for hatching.

* Short term loans outstanding extended mainly but not entirely to consumers and for other non-business purposes, by selected financial institutions. The table does not include short term loans of finance companies, or of trust and loan companies, second mortgage loans on residential real estate and loans of some other financial institutions for which comparable data are not available. ⁽¹⁾Conditional sales agreements held in connection with the financing of retail purchases of consumer goods. ⁽²⁾Companies licensed under the Small Loans Act. Cash loans have no conditional sales contract but are usually repaid in instalments. ⁽³⁾Excluded from the above tabulation are charge accounts and instalment credit of certain categories of dealers whose credit is extended mainly to farmers and other businesses rather than to consumers. Instalment credit includes conditional sales agreements only. ⁽⁴⁾In addition to the items shown here, quarterly figures are available on the use of oil companies' credit cards from Dec. 1955 on. Balances were as follows:

Dec. 1955-20 Mar. 1956-19 June 1956-23 Sept. 1956-28 Dec. 1956-28 Mar. 1957-25 June 1957-27

⁽⁵⁾Includes loans fully secured by marketable bonds and stocks, home improvement loans, etc. Excludes loans to finance purchase of Canada Savings Bonds.

⁽⁶⁾Figures for dates other than year ends are estimated on the basis of the loans by twelve companies.

⁽¹⁾ Data in this table refer to railways with annual operating revenues of \$500,000 or over. Monthly averages for 1955 and 1956 differ from the sum of the monthly data due to revisions which cannot be allocated by months. ⁽²⁾ As of January, 1955, the C.P., C.N. and Quebec North Shore and Labrador Railways use the "Uniform Classification of Accounts for Common Carriers by Railway". The Pacific Great Eastern Railway uses the new classification system as of January, 1956. Beginning in January, 1957, all railways follow the uniform classification of accounts, and the statistics previously shown in the "Other Railways" section in the upper half of the table are combined, as of that date, with those railways already following the new system. ⁽³⁾ Operating income equals operating revenues less operating expenses adjusted for tax accruals and rent of equipment and joint facilities. Source: Railway Operating Statistics, D.B.S.

(1) Foreign exchange and foreign securities. (2) Industrial Development Bank capital stock, bonds and debentures. (3) Bank premises and all other assets.
 (4) Capital, rest fund and all other liabilities. (5) On December 31, 1956, the basis for the valuation of securities held by The Bank of Canada was changed from "not exceeding market values" to amortized values, and for this reason figures for December 31 and later dates are not comparable with those for earlier dates.

⁽¹⁾Bank of Canada deposits are averages of the juridical days in the month shown while Bank of Canada notes and Canadian dollar deposit liabilities are averages of the 4 consecutive Wednesdays ending with the second last Wednesday in the previous month. ⁽²⁾The figures are not adjusted for items in transit. ⁽³⁾Prior to July 1st, 1954, the statutory minimum requirement was 5 per cent for each day; since that date it has been a monthly average of 8 per cent. ⁽⁴⁾Mainly deposits of foreign banks. ⁽⁵⁾Capital, rest fund and undivided profits as at the latest fiscal year-end. ⁽⁶⁾Including issues payable in foreign currency. ⁽⁷⁾Beginning January 31, 1957, month-end figures for chartered bank holdings of Government of Canada and provincial government securities are based on "amortized value" and are therefore not directly comparable with figures for preceding month-ends, which are based on "not exceeding market value". ⁽⁸⁾Beginning January 31, 1957, figures for certain chartered bank asset items are not strictly comparable with those for earlier dates owing to the reallocation of inner reserves consequent upon the securities valuation change referred to in footnote 7. ⁽⁹⁾Excluding Canadian day-to-day loans. ⁽¹⁰⁾Figures are not adjusted for items in transit. Includes loans to grain dealers and exporters, loans to finance the purchase of Canada Savings Bonds at time of issue and all other loans in Canada. ⁽¹¹⁾Includes deposits with other banks in foreign currency, foreign bank notes, gold and coin outside Canada and foreign currency items in transit (set). Note.—This series gives total new settled-for ordinary insurance sales in Canada, exclusive of revivals, increases, dividend additions, reinsurance acquired and pension bonds without insurance. Totals are estimates projected from the sales reported by 31 companies operating in Canada representing 57 per cent of new ordinary insurance sales.

⁽¹⁾The Canada totals by months for 1955 and 1956 do not correspond to the sum of the provincial totals as revisions applied to the national total are not yet available for the provinces. The Canada totals are comparable for these two years. Provincial monthly totals for 1955, however, are not comparable with those for previous years due to changes by several companies in the manner of reporting new business. For 1956, the provincial figures are comparable with each other, but are not strictly comparable with previous years; the same applies to the 1957 data. The annual figures for Canada and the provinces are consistent, although the 1956 data are still preliminary.

Note.—The definition of profits before taxes is based mainly on the accounting definitions used by corporations. However, depletion charges are added back to net profits while Canadian dividends received are excluded from profits in order to avoid duplication. The term "profits" as used here means the total profits of all companies earning profits less the losses of all companies incurring losses. Estimates are based on profits as reported by a sample of all companies incorporated in Canada.

(including government-owned companies and incorporated co-operatives).

(1) Includes, in addition to the industries listed, Agriculture, Forestry, Fishing and Construction, Rubber, Leather, Non-Metallic minerals, Petroleum and Coal and Miscellaneous Manufacturing Industries.

(3) Includes, in addition to the industries listed, Tobacco,
(4) Includes Printing and Publishing and Allied Industries.
